

1 Match the organs with their functions.

Draw a line to match each organ with the correct function.

1. Mouth

a. Absorbs nutrients into the bloodstream.

2. Stomach

b. Breaks down food with acid and enzymes.

3. Small intestine

c. Chews food and mixes it with saliva.

4. Large intestine

d. Moves waste out of the body.

2 Choose the correct answer.

Circle the best answer (A, B, C, or D).

1. Which organ produces bile?

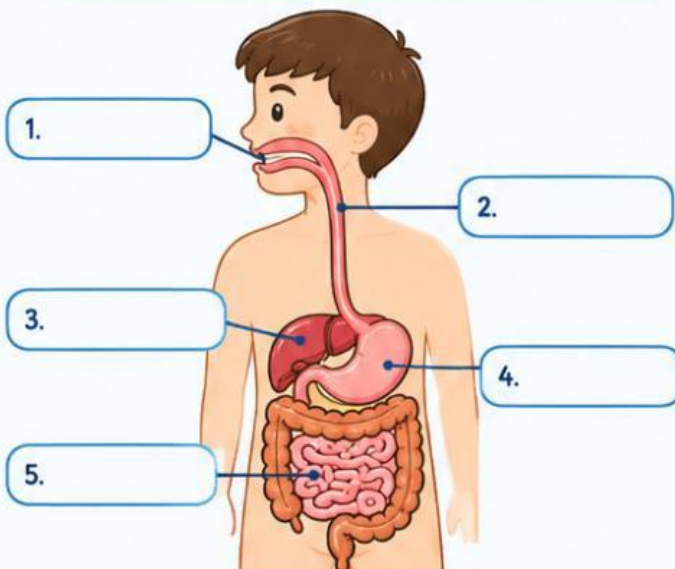

- A. Stomach B. Liver
C. Pancreas D. Small intestine

2. What is the main function of the large intestine?

- A. Absorbs water B. Breaks down food
C. Produces enzymes D. Moves waste

3 Look at the diagram. Label the parts of the digestive system.

mouth • esophagus • stomach
small intestine • large intestine

4 Read the text and answer the questions.

We need to eat healthy food to keep our digestive system working well. Fruits, vegetables, and water help us digest food and prevent constipation. Junk food and too much sugar can harm our stomach and intestines.

1. Why is healthy food important?

2. What can harm the digestive system?

Choose healthy food, choose a better you! ♥
