Yesterday afternoon five people got on a bus at the bus station: one man, two women and two children. The bus left the station at nine o'clock. It had to stop at the corner because the traffic lights were red. The bus turned left after the traffic lights.

The bus didn't stop at the first bus stop, but drove straight on because there weren't any people waiting there and no one wanted to get off. The bus turned right at the next corner and drove over the bridge. At the second bus stop, outside the school, the two children and the man got off and nine more people got on. Then the bus went into the train station, where ten people got off and 12 more got on. The bus drove out of the station, turned left and went straight on to the end of the road.

- 1 How many people got off at the second stop?
- 2 How many times did the bus turn left?
- 3 How many people were there on the bus when it drove out of the train station?
