Read the following passage about How Families Are Changing and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions

In the 1960s, it took pop and rock groups one or two days to record other their songs. Nowadays, it can take months and months. Many rock groups begin by recording only one instrument, for example, the voice. Then they record other instruments – electric piano, synthesizer, guitars, drums and so on.

Next, they might use a computer to add special effects. Finally, they ‘mix’ all the instruments until they get the sound that they want. This means that a CD or cassette will always sound very different from a live concert.

Music engineers have developed a new computer programme that will change the future of music. A computer can analyze a singer's voice. Then if you give the computer the lyrics and music of a song, the computer can 'sing' it in that voice. This means that a singer only needs to record one song and the computer

can then sing other songs in the singer's own voice. Singers can sing new songs many years after they have died.

Most of us listen to music for pleasure, but for the record companies, music is a product, the same as soap powder. When a record company finds a new group (or 'band'), they first try to develop the band's 'profile'. They will try to create an 'image' for the band that they think will attract young people. Instead of allowing the band's full artistic freedom, they will often tell the band what they should wear, what they should say and how they should sing and play.

In recent year, many rock groups have started their own record companies because they say that the big companies are too commercial.

Question 23: Which of the following is **NOT MENTIONED** in the passage?

- A. Rock groups now record their songs using computers.
- B. Special effects can be added to recordings using software.
- C. Most singers no longer need to perform in live concerts.
- D. A CD sounds different from a live performance.

Question 24: The word "freedom" in the last paragraph is **OPPOSITE** in meaning to:

- A. control
- B. independence
- C. creativity
- D. opportunity

Question 25: What does the word "it" in paragraph 5 refer to?

- A. the computer
- B. the singer's voice
- C. a new computer programme
- D. a song

Question 27: Which of the following best paraphrases the sentence: "Singers can sing new songs many years after they have died."?

- A. The new computer program allows deceased singers to have their voices digitally recreated for unrecorded material.
- B. Thanks to advanced technology, artists can perform fresh compositions long after their passing.
- C. Even after a singer's death, the computer program enables their unique vocal style to be applied to different songs.
- D. The future of music includes the possibility of singers' voices being preserved to perform future songs posthumously.

Question 28: Which of the following statements is **TRUE** according to the passage?

- A. Recordings from the 1960s sounded exactly like live concerts.
- B. Record companies generally grant bands complete artistic freedom.
- C. Modern recording techniques simplify the process, making it faster.
- D. Some rock groups have established their own labels due to concerns about commercialism.

Question 29: The contrast between music as a pleasure for listeners and a product for companies is highlighted in _____.

- A. paragraph 1
- B. paragraph 2
- C. paragraph 3
- D. paragraph 4

Question 30: Which paragraph discusses how record companies try to control a band's image?

- A. Paragraph 2
- B. Paragraph 3
- C. Paragraph 4
- D. Paragraph 5

Read the following passage about and mark the letter A, B, C, D on your answer sheet to indicate the best answer to each of the following questions from 31 to 40.

[I] In recent years, plastic pollution in the ocean has emerged as a severe environmental issue. [II] Each year, over eight million tons of plastic waste end up in our oceans, impacting marine life and ecosystems worldwide. [III] Single-use plastic items, such as bottles, bags, and packaging, are among the main culprits, as they break down into tiny particles known as microplastics. [IV]

One major consequence of ocean plastic pollution is its impact on marine animals. Sea creatures, including fish, turtles, and seabirds, often mistake plastic for food, leading to severe health problems or even death. Ingested plastic can block digestive tracts, reduce feeding, and ultimately cause starvation. Additionally, animals can become entangled in larger plastic debris like fishing nets and plastic rings, which restrict their movement and may lead to injuries or drowning. This not only affects individual animals but can also disrupt entire marine food chains and ecosystems.

Plastic pollution also has indirect effects on human health and economies. As fish and other marine animals ingest microplastics, these tiny particles move up the food chain and eventually reach humans. Consuming seafood contaminated with microplastics poses potential health risks, as harmful chemicals can accumulate in our bodies. Furthermore, polluted beaches and coastlines can deter tourism, impacting local economies that rely on these industries for jobs and income. Cleanup efforts are costly and challenging, often requiring substantial resources and funding.

To address ocean plastic pollution, governments, organizations, and individuals must work together. Policies such as banning single-use plastics, promoting recycling, and encouraging sustainable alternatives can help reduce the amount of plastic waste entering the ocean. Many individuals and organizations are already participating in beach cleanups and spreading awareness about the issue. By making conscious choices and taking responsibility, we can mitigate the impacts of plastic pollution and protect our oceans for future generations.

Question 31: Where in paragraph 1 does the following sentence best fit?

These microplastics are now found in all ocean depths, from surface waters to the seafloor, posing a serious threat to marine biodiversity.

- A. [I] B. [II] C. [III] D. [IV]

Question 32: The phrase "entangled in" in paragraph 2 could be best replaced by _____

- A. escaped from B. twisted in C. protected from D. engaged in

Question 33: The word "their" in paragraph 2 refers to _____

- A. plastic debris B. fishing nets C. plastic rings D. animals

Question 34: According to paragraph 3, which of the following is NOT a consequence of plastic pollution?

- A. Seafood contaminated with microplastics poses health risks to humans.
B. Plastic pollution results in reduced oxygen levels in the ocean.
C. Polluted coastlines harm tourism and local economies.
D. Plastic pollution leads to increased cleanup costs for coastal areas.

Question 35: Which of the following best summarises paragraph 3?

- A. Plastic pollution harms human health, affects tourism, and requires costly cleanup efforts.
B. Microplastics in seafood threaten human health and increase cleanup needs.
C. Contaminated seafood poses health risks and impacts tourism in coastal regions.
D. Plastic pollution leads to economic costs and harms human health through seafood.

Question 36: The word "substantial" in paragraph 3 is OPPOSITE in meaning to _____

- A. considerable B. noticeable C. negligible D. massive

Question 37: Which of the following is TRUE according to the passage?

- A. Most plastic waste in the ocean comes from biodegradable materials.
B. Plastic pollution directly affects marine animals and has indirect impacts on humans.
C. Microplastics only accumulate in shallow waters, affecting coastal marine life.
D. Consuming seafood contaminated with microplastics does not affect human health.

Question 38: Which of the following best paraphrases the underlined sentence in paragraph 4?

- A. Taking responsibility and reducing waste will allow us to prevent plastic pollution and save our oceans permanently.
- B. We can reduce the causes of plastic pollution and make our oceans safe for future generations by increasing our awareness.
- C. Taking immediate action for the environment will help protect future generations from plastic pollution and keep our oceans clean.
- D. We can lessen the effects of plastic pollution and protect our oceans for future generations by making thoughtful decisions and taking responsibility.

Question 39: Which of the following can be inferred from the passage?

- A. Collective actions are necessary to effectively reduce ocean plastic pollution
- B. International cooperation is the most critical factor in resolving plastic pollution
- C. Reducing plastic waste in oceans depends on limiting individual use of single-use plastics
- D. Increased awareness alone will lead to a significant decrease in ocean plastic pollution

Question 40: Which of the following best summarises the passage?

- A. Ocean plastic pollution endangers marine species and impacts human health through contaminated seafood, with cleanup efforts essential to managing the effects.
- B. Plastic waste in oceans poses risks to marine animals, damages tourism, and leads to costly cleanup efforts, which can be addressed by increased awareness and individual action.
- C. Ocean plastic pollution affects both marine life and coastal communities; individual actions, like reducing single-use plastics, can help address the problem.
- D. Plastic pollution in oceans harms marine life and has indirect impacts on human health and local economies, requiring joint efforts to reduce single-use plastics and promote sustainable practices.
