

Understanding Square Numbers

TRUE or FALSE

The Square is a Geometric Figure

The Square DOES NOT have four equal sides

The Square DOES NOT have four equal angles

The Area of a Square is found by multiplying it's side by itself

$$2^2 = 2 + 2 = 4$$

$$3^2 = 3 \times 3 = 9$$

Calculate

$$4^2 =$$

$$5^2 =$$

$$6^2 =$$
