2 The Dateline

Simply put, the date is the day the letter is sent. The most commonly used date format is : August 6, 2025.

Do not abbreviate the month and always include all four digits of the year.

In general, there are two types of writing the dateline :

2.1 Month + Date + Year Example : July 22, 2025

2.2 Date + Month + Year Example : 22 July 2025

The dateline sometimes is written in numbers. **We don't use the dateline number to write in the business letter.**

Example : 12/6/2025

British English : the twelfth of June two thousand twenty-five

British American : the sixth of December two thousand twenty-five
