-

Part 3: Reading Comprehension

Read the text about the African Elephant and answer the questions below.

The African Elephant

The African elephant is the largest land animal on Earth. They are slightly larger than their Asian cousins and can be identified by their larger ears, which are shaped a bit like the continent of Africa.

Elephants are very social animals. They live in groups called herds, led by the oldest female elephant. Elephants eat leaves, fruit, grass, and bark. A single adult elephant can eat up to 150 kilograms of food every day! They also love water and enjoy swimming to cool off on hot days.

Questions:

1. **True or False?** African elephants are smaller than Asian elephants.

Answer: _____

2. **What determines the leader of an elephant herd?**

- A) The strongest male
- B) The oldest female
- C) The largest elephant

3. **How much food can an adult elephant eat in one day?**

Answer: _____

4. **Why do elephants like swimming?**

Answer: _____
