Internet Usage Worldwide

4.95 billion people around the world use the internet in January 2022 –equivalent to 62.5 percent of the world's total population which means that almost two-thirds of the global population is currently connected to the world wide web. However, there are now fewer than 3 billion people around the world don't use the internet.

Internet access can differ depending on the age. The graph shows the distribution of internet users worldwide as of 2019, by age group.

LIVEWORKSHEETS

Kids are addicted to their smart phones and other mobile devices. The average teen between 13 and 18 spends about 9 hours a day consuming media and that it's outside of their schools and homework. They like watching shows, playing games, connecting on social media, and listening to music. In a different way, the main purposes of adult respondents for internet usage are "to read newspaper and magazines" (64.5%), "to get information" (60.5%), and "chatting – facebook, Msn, ICQ" (34.7%).
