Std_ID : _____ Name : _____

Computer Vocabulary

- a program that finds and removes viruses from a computer

- a self-contained program or piece of software; an application, especially when downloadable to a mobile device

- a self-contained program or piece of software

- a copy of files from a computer's hard disk, usually made on some external medium such as CD-ROM or flash drive. A backup is made in case the hard disk file(s) are erased or damaged.

- a bit is the smallest piece of information that computers use. For simplicity, a PC uses bits in groups of 8 called bytes (8 bits = 1 byte).

- a way of communicating wirelessly over short distances between electronic devices (for example computer and mobile telephone)

- You boot (or boot up) your computer when you switch it on and wait while it prepares itself. Instructions for startup are given to the computer from the boot disk, which is usually the hard disk.

LIVEWORKSHEETS

- A browser is a program like Firefox or Internet Explorer. You use it to view or browse the Internet.
