LEARNING ENGLISH WITH EXPLORER JULIAN!

Deep in the thickest part of the Colombian jungle, a young and curious explorer named Julian walked carefully through the wet vegetation. He carried a heavy notebook and a camera to study the wild creatures of the region. As the afternoon sun started to hide behind the massive trees, Julian realized how fascinating and competitive life in the wilderness truly is.

First, he stopped near a wide river where a giant, powerful elephant walked slowly through the muddy banks, carrying heavy branches because its body size is immense. Julian wrote in his notebook: "The elephant is bigger and stronger than almost any other creature here." Just a few meters ahead, a very tall giraffe stretched its long neck to reach the highest green leaves at the top of the canopy, no other animal in the area could touch the treetops as effortlessly as it did. Julian smiled and noted: "The giraffe is definitely the tallest animal in the jungle."

Suddenly, the silence broke with a loud roar. A swift lion ran rapidly across the open grassy patch to catch its dinner, proving to be much quicker than the heavy bears or slower reptiles hiding in the shadows. Julian watched in amazement as the lion moved with incredible speed, confirming that speed is the key to survival in the wild. Further down the path, a clever fox darted quickly between the bushes, looking smaller than the lion but acting much more quietly. Every wild animal in this untamed world plays a unique role, making the jungle a brilliant and mysterious place of endless contrasts.

Part 1: True or False (Verdadero o Falso)

Instructions: Read the text and write True (T) or False (F) next to each sentence according to the reading.

1. Julian is an explorer who carries a notebook and a camera to study wild creatures. ( )
