SCIENCE WORKSHEET

Topic: Understanding Food Chains

Part A: Fill in the blanks

Use the words in the box.

Producer | *Consumer* | *Decomposer* | *Sun* | *Energy*

1. The main source of energy for most food chains is the _____.
2. A green plant that makes its own food is called a _____.
3. An animal that eats plants or other animals is called a _____.
4. Fungi and bacteria are examples of _____.
5. Energy moves from one organism to another in a food _____.

Part B: True or False

Write TRUE or FALSE.

1. Plants are producers. _____
2. Frogs make their own food. _____
3. Decomposers break down dead plants and animals. _____
4. The sun provides energy for plants. _____
5. Animals depend on other living things for food. _____

Part C: Complete the food chain

Study the food chain below.

Sun → Grass → Grasshopper → Frog

1. Which organism is the producer? _____
2. Which organism eats the grass? _____
3. Which organism eats the grasshopper? _____
4. What does the sun provide to the grass? _____
