Grade 5 | Mixed Numbers Calculations | Practice Worksheet

Name: _____ Date: _____

Don't forget to **change the mixed numbers to improper fractions first** then **simplify** your answers at the end!

Add	Subtract	Multiply	Divide
Find a common denominator. Find equivalent fractions with that denominator. Add or subtract the numerators and put the answer over the same denominator.		Multiply the numerators together, multiply the denominators together.	Keep the first fraction, flip the second fraction (find its reciprocal), then multiply.
$3\frac{1}{4}+1\frac{2}{3}$	$4\frac{3}{4}-1\frac{1}{3}$	$2\frac{1}{4}\times1\frac{2}{3}$	$4\frac{2}{3}\div1\frac{1}{4}$
$2\frac{1}{5}+1\frac{3}{4}$	$2\frac{4}{5}-1\frac{3}{4}$	$3\frac{1}{8}\times2\frac{3}{5}$	$2\frac{1}{6}\div3\frac{2}{3}$
$2\frac{7}{8}+2\frac{4}{5}$	$3\frac{1}{3}-1\frac{5}{8}$	$1\frac{2}{5}\times3\frac{1}{9}$	$3\frac{4}{5}\div1\frac{5}{8}$
