C. These dense mountain forests also shelter endangered giant pandas and golden monkeys
D. It serves as a model for sustainable tourism across Asia's national parks

21. ..... **22.** ..... **23.** ..... **24.** .....

Read the following passage and choose the correct answer (A, B, C or D) for each question. (1 pt)

The Tidal Mangroves of the Sundarbans

Spanning the delta where the Ganges and Brahmaputra rivers meet the Bay of Bengal, the Sundarbans is the largest continuous mangrove forest in the world. Covering over one million hectares across India and Bangladesh, this coastal wetland is a labyrinth of muddy islands, tidal channels, and salt-tolerant mangrove trees. Twice a day, rising ocean tides flood the forest floor, submerging the arched roots of the trees before retreating back into the sea.
These dense mangrove roots play a vital environmental role. Underwater, they form a sheltered nursery for young fish, crabs, and shrimp. Above the water, the thick forest acts as a giant natural shield that absorbs the destructive force of tropical cyclones and tidal waves, protecting millions of people living in coastal villages. The forest is also a critical sanctuary for rare fauna, including river dolphins, spotted deer, and the endangered Bengal tiger.

LIVEWORKSHEETS

However, rising sea levels and increasing water salinity now threaten the survival of freshwater mangrove species. In a recent regional conference, environmental scientists asked local leaders if community tree-planting programmes could restore damaged coastal buffer zones. Today, thousands of villagers work alongside park rangers to plant native mangrove saplings, proving that protecting nature also protects human communities.

25. What is the main purpose of the passage?

A. To explain how fishermen build wooden boats in India.
B. To compare desert sand dunes with high mountain peaks.
C. To describe the ecology and importance of the Sundarbans.
D. To advertise luxury hotel resorts along the Bay of Bengal.

26. The word "they" in paragraph 2 refers to _____.

A. coastal villages
B. tropical cyclones
C. rising ocean tides
D. dense mangrove roots

27. How does the mangrove forest protect people living in coastal villages?

A. It provides high rocky cliffs for building stone houses.
B. It absorbs the destructive force of cyclones and waves.
C. It blocks all river water from reaching the ocean.
D. It keeps the coastal weather cold and snowy all year.

28. What are villagers and rangers doing to help the Sundarbans today?

A. Planting native mangrove saplings in damaged zones.
B. Cutting down old trees to build wider highways.
C. Draining the muddy river channels to create farmland.
D. Moving Bengal tigers to zoos in foreign countries.

Use the correct form of the word given in each sentence. (1 pt)

29. The government has launched a new project for the ..... of coastal wetlands. (PRESERVE)
