The weather around us...

"Every day, the weather is different. Sometimes it is sunny and hot. Sometimes it is rainy and cold. In spring, flowers grow and the weather is warm. In summer, the sun shines and children swim. In autumn, the leaves fall and the wind blows. In winter, it is cold, and sometimes it snows.

People wear different clothes for different weather. On a sunny day, we wear a hat and sunglasses. On a rainy day, we use an umbrella and wear a raincoat. On a cold day, we wear a coat, a scarf, and gloves.

We can also do different activities depending on the weather. On a sunny day, we can play outside, ride a bike, or have a picnic in the park. On a rainy day, it is fun to stay home, read a book, or watch a movie with our family. When it snows, children love to make a snowman and play with snowballs.

The weather changes every season, and each season brings something special. We can learn a lot by watching the sky and the clouds!"
