Multimedias are as follows :

Multimedia is a form of communication that combines different content forms such as text, audio, images, animations, or video into a single interactive presentation. Popular examples of multimedia include video podcasts, audio slideshows and animated videos.

Multimedia can be recorded for playback on computers, laptops, smartphones, and other electronic devices, either on demand or in real time (streaming).

In common usage, multimedia refers to an electronically delivered combination of media including video, still images, audio, and text in such a way that can be accessed interactively.

In modern times, a multimedia device can be referred to an electronic device such as a smartphone, a videogame system, or a computer. All of these devices have one main, but also have other functions beyond their intended purpose such as reading, writing, recording video, streaming, listening to music, and playing video games. This has lend them to be called "multimedia devices".

- ☐ game
- ☐ animation
- ☐ video
- ☐ cartoon

- ☐ streaming
- ☐ music
- ☐ TV channel
- ☐ audio
