🚀 Unit 3: Space, Planets & Superlatives

Name: _____ **Date:** _____

📖 Reading: Our Amazing Universe

Welcome to our amazing universe! There are eight **planets** in our solar system, and they are all very different. **Mercury** is **the smallest** planet, and it is also **the nearest** planet to the sun. However, **Venus** is **the hottest** planet!

Next to Venus is **Earth**. I think Earth is **the most interesting** and **the most important** planet in the universe because we live here. Earth has **the moon**, and at night we can see millions of **stars** in the sky.

Earth is also home to incredible places and animals. For example, **Niagara Falls** is **the most famous** waterfall in the world. Many tourists visit it every year. In the jungles and zoos, **tigers** are **the most popular** animals. Some people think spiders are **the scariest** animals, and monkeys are **the funniest** and **the hairiest**!

What about the other planets? **Mars** is red, and **Jupiter** is huge. **Saturn** has beautiful rings, so many people think it is **the prettiest** planet. **Uranus** and **Neptune** are very far away and cold.

Exploring space is **the most exciting** adventure! Astronauts travel into space in a **rocket**. Building a rocket is **the most expensive** project, so it takes a lot of time and money. When astronauts look at Earth from space, they are **the happiest** people in the universe!
