Renewable Energy Questions

- ____ 1. What is renewable energy?
- Energy that can be replenished easily
 - Energy that cannot be replenished easily
- ____ 2. Hydropower, Solar Power, and Wind Power are examples of renewable energy.
- True
 - False
- ____ 3. Solar Power is energy that comes from ____ .
- the wind
 - the sun
- ____ 4. Hydropower is energy that comes from ____ .
- water
 - plants
- ____ 5. Wind Power is energy that comes from ____ .
- oil
 - wind
- ____ 6. Most renewable energy sources produce low amounts of greenhouse gas. This is a(n) ____ .
- advantage
 - disadvantage
- ____ 7. Some renewable energy sources, like solar power and hydropower, are expensive to build or install. This is a(n) ____ .
- advantage
 - disadvantage
- ____ 8. Wind power structures can harm bats and birds. This is a(n) ____ .
- advantage
 - disadvantage
- ____ 9. Biomass energy burns cleaner than oil. This is a(n) ____ .
- advantage
 - disadvantage
- ____ 10. Geothermal energy is cost efficient. This is a(n) ____ .
- advantage
 - disadvantage
