Renewable Energy Questions

____ 1. What is renewable energy?
a. Energy that can be replenished easily
b. Energy that cannot be replenished easily

____ 2. Hydropower, Solar Power, and Wind Power are examples of renewable energy.
a. True
b. False

____ 3. Solar Power is energy that comes from ____.
a. the wind
b. the sun

____ 4. Hydropower is energy that comes from ____.
a. water
b. plants

____ 5. Wind Power is energy that comes from ____.
a. oil
b. wind

____ 6. Most renewable energy sources produce low amounts of greenhouse gas. This is a(n) ____.
a. advantage
b. disadvantage

____ 7. Some renewable energy sources, like solar power and hydropower, are expensive to build or install. This is a(n) ____.
a. advantage
b. disadvantage

____ 8. Wind power structures can harm bats and birds. This is a(n) ____.
a. advantage
b. disadvantage

____ 9. Biomass energy burns cleaner than oil. This is a(n) ____.
a. advantage
b. disadvantage

____ 10. Geothermal energy is cost efficient. This is a(n) ____.
a. advantage
b. disadvantage
