

A) Solve the following addition problems.

1)	$6\,257 + () = 13\,140$	2)	$7\,687 + () = 13\,201$	3)	$8\,899 + () = 16\,486$
4)	$9\,379 + () = 15\,241$	5)	$6\,586 + () = 15\,425$	6)	$() + 3\,496 = 11\,404$
7)	$() + 1\,995 = 10\,830$	8)	$() + 4\,763 = 13\,760$	9)	$() + 2\,835 = 10\,634$
10)	$() + 4\,793 = 14\,561$	(a) $+() = -$ (b) $() + = -$ Example: (a) $20 + (5) = 25$ Solution: $25 - 20 = 5$ (b) $(5) + 20 = 25$ Solution: $25 - 20 = 5$
