- C What can people like you do?
- D What can you learn from big business?
- E Who should you listen to?

**HELP US SAVE THE ENVIRONMENT.**  
**HOW AND WHY?**

1

It's easy to criticise government and big businesses for not doing anything. But what do you do? Change should start with us as individuals. Then we will be in a better position to tell others what they should be doing. Start simply. Use the car less, recycle more. It isn't the government's planet. It's ours. So let's take care of it ourselves.

2

Governments often use green policies as an excuse to raise more money in taxes. However, being green isn't expensive. Cycling is cheaper than driving. Switching machines off reduces electricity bills. Recycling lowers your rubbish bills. Even large scale projects like adding solar panels to your roof can save money in the long run.

3

Recycling seems complicated and time consuming but it isn't really. When you start doing it regularly, it will become a normal part of your life. People who have done it know this. Ask them for advice and don't let others persuade you that it is too much trouble.

4

So, you've made the effort and noticed the benefits. That's good. You're halfway there. Now it's time to let your friends, family and neighbours know too. Even if they don't listen to you at first, it won't cost you anything and, in the end, they'll thank you
