| I. A description of the town's main features | |

00. The quiet and peaceful seaside town of Greenfield is a hive of activity these days. Tim Higgins, the famous chef and successful author of cookbooks, has chosen this small fishing town as a film location for the first season of his program Cooking & the Country.

19. In addition to putting Greenfield on the map, the presence of Higgins and his team of more than fifty fully fledged professionals, including cameramen, sound technicians, hairdressers or make-up artists, will surely boost the local economy. Filming, expected to last for at least two weeks, will provide extra revenue. The two hotels in the town are already fully booked, and restaurants are hiring extra staff to cater all diners expected for the next fortnight.

20. In a recent interview, Higgins said he had chosen Greenfield not only for its excellent location in a rural setting of unparalleled beauty but also for the reputation of its local cuisine. Not in vain The Blue Bell, a small family business specialized in fish and seafood, is listed in one of the chef's recommended restaurant guides.

21. Another reason, which perhaps even chef's fans ignore, is that Higgins has family roots in the region. His maternal great-grandfather was born and grew up in a small town not far from Greenfield. His ancestor was a primary school teacher and a regular chronicler for the local newspaper. Higgins is not the chef's birth name, but his mother's maiden name, and a link to both the past of his family and to the region.

22. Regarding the show Cooking & the Country, Higgins stated that the project was conceived more than a decade ago when he was not a world-famous chef yet. He was prompted to it by his passion for cooking and his interest in perpetuating traditional recipes as well as his eagerness to show the world the gastronomic delights of this unfairly underestimated cuisine.
23. This first season comprised of three episodes, focused on Green Country cuisine, in which he chef will delight us with traditional local dishes as well as with more innovative recipes, some of his creation, in which despite their more modern and avant-garde character, the chef will use local, seasonal vegetables, true to his philosophy of using only high-quality products.
24. Peter Bowles, mayor of Greenfield, has already expressed his gratitude to the chef and his team, and has declared that both his government team and the rest of Greenfield's neighbours will do everything in their hands to make them feel at ease and to ensure the chef can comply with tight filming deadline.
25. The countdown has already begun since filming is expected to start in two days. We hope the weather will not be adverse to shoot outdoors, although most of the filming will take place in the makeshift kitchen of the filming set, equipped with cutting-edge technology that, we hope, will live up to the chef's expectations. We wish him good luck in this new enterprise!
