

Read and do the activities**A. Jewellery Designer**

I'm a jewellery designer. I take metal and precious stones and create rings, necklaces, earrings and other jewellery. I can use loads of hand tools to make the jewellery. Sometimes, I may use computers and laser to design these delicate pieces.

My work requires attention to detail. It also requires finger and hand dexterity, good hand-eye coordination, patience and concentration. Artistic ability and knowledge about fashion are very important.
