

Science Homework 4/12/2021
Use Five Ponds Press Textbook Pages 142-145

1. _____ large inland bodies of water. Almost all lakes hold fresh water and are fed and drained by small rivers or streams.
a. rivers
2. _____ deep underground holes (pockets) between the soil and rocks
b. aquifers
3. _____ mammoth bodies of saltwater. There are five of these and they cover 70% of the Earth's surface and contain 97% of the planet's water.
c. oceans
4. _____ this is a large human-made "lake" that captures water from nearby creeks and rivers and stores it.
d. reservoir
5. _____ large bodies of water that are surrounded by land on three sides. Usually have a small channel that connects them to a larger body of water, such as the ocean.
e. four major rivers in Virginia
6. _____ long, ribbon-like waterways that usually flow toward an ocean, lake, bay, or other rivers. These are fed by precipitation, snowmelt, or natural springs (water from beneath the Earth's surface).
f. bays
7. _____ Potomac, Rappahannock, York, and James
g. James, York, Potomac, Rappahannock
8. _____ Flow into the Chesapeake Bay
h. lakes
9. _____ Flows into the Atlantic Ocean
i. Chesapeake Bay
10. _____ Lake Drummond and Mountain Lake are two _____ lakes in Virginia.
j. natural
