

# ROBOT FACES

22-03-2021

level 3

Find the missing word:

Russian robot manufacturer Promobot, whose service Promobots already work in 40 countries around the world, has opened a new department for the development of hyper-realistic \_\_\_\_\_ (*with the appearance and qualities of a human*) robots using 3D modeling,

The company has a laboratory for the development of artificial skin, eyes, teeth and the entire outer shell, and the aim is to bring \_\_\_\_\_ (*ideas or opinions about beauty or art*) of sculpture and art into a rapidly developing market of humanoid robots. The manufacturer combines knowledge with technical and digital skills to make a \_\_\_\_\_ (*huge, very big*) leap in this business, and its plan is to start mass production of the technologies by the end of the year.

Promobot wants to start producing the whole body and to have a full \_\_\_\_\_ (*the human body apart from the head, neck and limbs*) with legs, with all parts being movable.
