

**Math Final Exam**  
**First Term**  
**Transition \_\_\_\_\_**

Name: \_\_\_\_\_ Date: \_\_\_\_\_

1. Solve the addition word problem, write the answer.

|   |     |   |              |
|---|-----|---|--------------|
|  <p>5 horses</p> | and |  <p>3 more horses</p> | _____ horses |
|  <p>3 dogs</p>  | and |  <p>2 more dogs</p>  | _____ dogs   |

2. solve the additions. Choose the correct option.

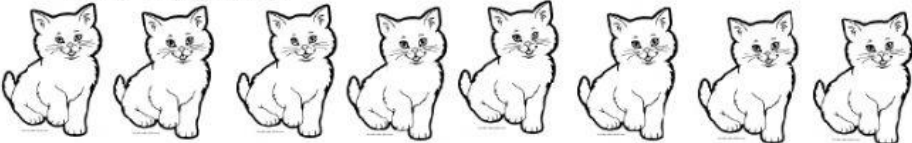

|  |  |
|--|--|
| <p><b>4 dogs and 4 more dogs.</b></p>  <p><math>4 + 4 =</math> _____</p> <p>( 8 )   ( 1 )   ( 6 )</p> | <p><b>4 bees and 5 more bees.</b></p>  <p><math>4 + 5 =</math> _____</p> <p>( 10 )   ( 6 )   ( 9 )</p> |
|--|--|

3. Match the number sentence that show the same addition in a different order

|                    |                    |                   |
|--------------------|--------------------|-------------------|
| $8 + 4 = 12$<br>•  | $10 + 8 = 18$<br>• | $6 + 7 = 13$<br>• |
| •<br>$8 + 10 = 18$ | •<br>$7 + 6 = 13$  | •<br>$4 + 8 = 12$ |

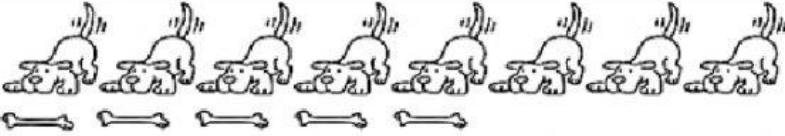

4. Solve the subtractions. Now, match and subtract to compare. Write the answer.

There are 8 cats. 6 are white, the rest are black. How many cats are black?  
Write the answer

$8 - 6 = \underline{\quad}$

---

$8 - 5 = \underline{\quad}$        $\underline{\quad}$  more 

5. Match the model to the number sentence.

•

$$10 + 3 = 13$$

•

$$10 + 5 = 15$$

•

$$10 + 6 = 16$$
