

- 3 Find the quotient and remainder when 319 is divided by 3.

$$319 \div 3 = ?$$

First, divide the **hundreds** by 3.
 $3 \text{ hundreds} \div 3$
 $= 1 \text{ hundred in each group}$

$$\begin{array}{r} 1 \\ 3 \overline{) 319} \\ \underline{3} \end{array}$$

Then, divide the **tens** by 3.
 $1 \text{ ten} \div 3 = 0 \text{ tens}$
 in each group with
 remainder 1 ten.

$$\begin{array}{r} 10 \\ 3 \overline{) 319} \\ \underline{3} \\ 1 \\ \underline{0} \\ 1 \end{array}$$

Regroup the 1 ten.
1 ten = 10 ones

Add the ones.
10 ones + 9 ones
= 19 ones

$$\begin{array}{r} 10 \\ 3 \overline{) 319} \\ \underline{3} \\ 10 \\ \underline{9} \\ 19 \end{array}$$

Lastly, divide the **ones** by 3.

19 ones \div 3
= 6 ones in each group
with remainder 1 one

$$\begin{array}{r} 106 \\ 3 \overline{) 319} \\ \underline{3} \\ 10 \\ \underline{9} \\ 19 \\ \underline{18} \\ 1 \end{array}$$

So, $319 \div 3 = 106 \text{ R}1$.

The quotient is 106.
The remainder is 1.

4 Divide 673 by 2.

$$673 \div 2 = ?$$

First, divide the **hundreds** by 2.

$$\begin{array}{l} 6 \text{ hundreds} \div 2 \\ = 3 \text{ hundreds} \\ \text{in each group} \end{array}$$

$$\begin{array}{r} \\ 2 \overline{) 673} \\ \hline \end{array}$$

Then, divide the **tens** by 2.

$$\begin{array}{l} 7 \text{ tens} \div 2 \\ = 3 \text{ tens in each group} \\ \text{with remainder } 1 \text{ ten} \end{array}$$

$$\begin{array}{r} 3 \\ 2 \overline{) 673} \\ \underline{6} \\ \end{array}$$

Regroup the 1 ten.

$$1 \text{ ten} = 10 \text{ ones}$$

Add the ones.

$$10 \text{ ones} + 3 \text{ ones}$$

$$= 13 \text{ ones}$$

$$\begin{array}{r} 33 \\ 2 \overline{) 673} \\ \underline{6} \\ 7 \\ \underline{6} \\ 13 \end{array}$$

Lastly, divide the **ones** by 2.

$$13 \text{ ones} \div 2$$

= 6 ones in each group with remainder

$$1 \text{ one}$$

$$\begin{array}{r} 33 \\ 2 \overline{) 673} \\ \underline{6} \\ 7 \\ \underline{6} \\ 13 \end{array}$$

$$\text{So, } 673 \div 2 = 336 \text{ R1}$$
