**HOW GREEN ARE WE?**

Meet the Smiths. Like any average British family, they produce about 23 kg of rubbish every week. Every year the amount of rubbish they produce grows by 4 per cent. We asked the family to keep their rubbish for a week in order to find out what they were throwing away. They were shocked when they saw the contents of their weekly rubbish bins on the kitchen table. ‘We didn’t realise we throw away so much.’ When we told them that 60 per cent of that rubbish could be recycled, they decided to start doing it immediately. The town in which they live has had a recycling programme for all the citizens for a few years now. They can put materials such as paper, cans, bottles and old clothes into special recycling banks in the streets. Thanks to the programme, the amount of household waste recycled has gone from 7 to 14 per cent.

- 1 The Smiths produce over twenty kg of rubbish \_\_\_\_\_.
- 2 In the experiment, the rubbish of the Smiths was put on their \_\_\_\_\_ for the family to check.
- 3 The family learned that only \_\_\_\_\_ per cent of their rubbish can’t be recycled.
- 4 The Smiths may put their old things into special \_\_\_\_\_ all around their town.
- 5 Thanks to the programme, the percentage of the recycled rubbish is now \_\_\_\_\_ than before.
