

Simplifica fracciones

I. Simplifica las fracciones: Escoge el máximo común que se presentan.

Factores

a. $\frac{4}{8} \div \frac{\square}{\square} = \frac{\square}{\square}$

Factores de 4: 1, 2, 4

Factores de 8: 1, 2, 4, 8

b. $\frac{8}{12} \div \frac{\square}{\square} = \frac{\square}{\square}$

Factores de 8: 1, 2, 4, 8

Factores de 12: 1, 2, 3, 4, 6, 12

c. $\frac{24}{48} \div \frac{\square}{\square} = \frac{\square}{\square}$

Factores de 8: 1, 2, 3, 4, 6, 8, 12, 24

Factores de 24: 1, 2, 3, 4, 6, 8, 12, 16, 24

d. $\frac{16}{36} \div \frac{\square}{\square} = \frac{\square}{\square}$

Factores de 16: 1, 2, 4, 8, 16

Factores de 36: 1, 2, 3, 4, 6, 9, 12, 36

e. $\frac{15}{25} \div \frac{\square}{\square} = \frac{\square}{\square}$

Factores de 15: 1, 3, 5, 15

Factores de 25: 1, 5, 25
