VERIFICA di GEOMETRIA
ANGOLI

Collega:

**ANGOLO
RETTO**

**ANGOLO
ACUTO**

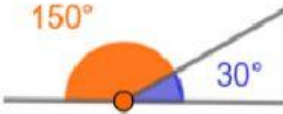

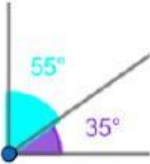

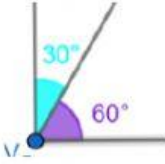

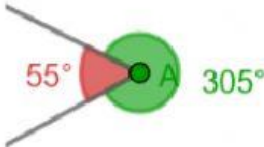

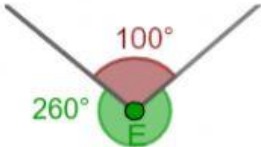

**ANGOLO
OTTUSO**

Collega alla definizione la figura e la misura corrispondenti:

	<input type="checkbox"/>	<input type="checkbox"/> ANGOLO RETTO	<input type="checkbox"/>	<input type="checkbox"/> 90°
	<input type="checkbox"/>	<input type="checkbox"/> ANGOLO PIATTO	<input type="checkbox"/>	<input type="checkbox"/> 180°
	<input type="checkbox"/>	<input type="checkbox"/> ANGOLO GIRO	<input type="checkbox"/>	<input type="checkbox"/> 360°

Metti gli angoli in ordine nella tabella

		
		

ANGOLI		
COMPLEMENTARI	SUPPLEMENTARI	ESPLEMENTARI

Determina l'ampiezza dell'angolo complementare a quello dato:

SE $\alpha = 40^\circ$ $\beta = 90^\circ - \circ = \circ$

SE $\alpha = 10^\circ$ $\beta = \circ - \circ = \circ$

Determina l'ampiezza dell'angolo supplementare a quello dato:

$\alpha = 100^\circ$
 $\beta = 180^\circ - \circ = \circ$

$\alpha = 30^\circ$
 $\beta = \circ - \circ = \circ$

Esegui le seguenti operazioni in colonna:

$$97^{\circ} 23' 12'' + 17^{\circ} 12' 1'' =$$

°	'	''	+	
°	'	''	=	
°	'	''		

$$47^{\circ} 35' 42'' - 17^{\circ} 14' 41'' =$$

°	'	''	-	
°	'	''	=	
°	'	''
