

1) Complete.

- a) The angle measures between  $1^\circ$  and  $89^\circ$ .
- b) The angle measures exactly  $90^\circ$ .
- c) The angle measures between  $91^\circ$  and  $179^\circ$ .
- d) The angle measures exactly  $180^\circ$ .
- e) The tool used to measure angles is called:
- f) The point or the part of an angle where the two arms of an angle meet is called:

2) Solve and answer.

- a) If an angle measures  $91^\circ$  degrees is called:
- b) If an angle measures  $90^\circ$  degrees is called:
- c) If an angle measures  $179^\circ$  degrees is called:
- d) If an angle measures  $180^\circ$  degrees is called:
- e) If an angle measures  $1^\circ$  degrees is called:
- f) If an angle measures  $89^\circ$  degrees is called:
- g) If an angle measures  $5^\circ$  degrees is called:
