1. \_\_\_\_\_  
2. \_\_\_\_\_

\_\_\_\_\_ disease are not  
contagious, you can obtain it cause  
\_\_\_\_\_, lifestyle, \_\_\_\_\_  
inheritance.  
Some types are: \_\_\_\_\_,  
\_\_\_\_\_, skin cancer  
\_\_\_\_\_ can cause different  
types of cancer.

The \_\_\_\_\_ protects the  
body against diseases.

infectious cause by fungi:

1. \_\_\_\_\_

2. \_\_\_\_\_

Infectious cause by protozoan:

1. \_\_\_\_\_

2. \_\_\_\_\_

Infectious cause by helminth:

1. \_\_\_\_\_

2. \_\_\_\_\_

Infectious

harmful

viruses

genetic

Non-infectious

bacteria

environment

obesity

Influenza

amebiasis

pneumonia

HIV

hookworm

diabetes

malaria

Fungal infectious

tuberculosis

ascariasis

asthma

Athletes foot

Immune system
