

My Animal

How much does an adult animal weigh?	In what part of the world is this animal mostly found?	What predators or threats does this animal have?
What are the baby animals called?	What do they eat?	In what type of habitat does your animal live?
To what classification group does your animal belong?	What is the average number of years they live?	How old are they when they can have babies?

I found my answers in the book
