## **Solving Equations**

Solve the following equations then drag your answer under the question to check if you are correct

3 + 2(x - 3) = 5	7x + 4 = 2x + 9	6 - 2x = 4x + 12
5(x-3) = 10	8 = 3x - 1	7(x - 2) = 4(x + 1)
4(x+5)=0	8 - 3x = 2	5x - 2 = 4x + 5

x = 1	x = 6	x = -1
x = 3	x = -5	x = 4
x = 7	x = 5	x = 2
