Chapter 11: Statistical Measures
Lesson 2: Median and Mode

Note: (i) Median:

Step 1: Arrange the data in ascending order

Step 2: Median is the middle number, if there are 2 numbers in middle then add them and then divide by 2

(ii) Mode: The data which repeats the most time

Find the median and mode of the below given set of numbers.

1. 28, 36, 18, 25, 12, 44, 18, 42, 34, 16, 30.

Median =

Mode =

2. 34, 35, 31, 36, 31, 24, 33, 38.

Median =

Mode =

3. 14, 12, 14, 14, 19, 18, 11, 16, 30, 12, 19, 15.

Median =

Mode =

4.

Number of Flowers

Median =

Mode =   ,

5.

Test Grades			
100	77	80	65
87	85	85	82
100	97	95	75

Median =

Mode =   ,
