

# A tale of two brains

In this entertaining film, marriage expert Mark Gungor explores the differences between men and women.

Men's brains are made up of...

- little bags
- many little boxes
- a big box with little boxes in it

The main rule for men's brains is...

- the boxes don't come into physical contact
- the box is opened only when they have to discuss a particular subject
- the boxes don't need to be opened carefully

Women's brains are made up of...

- a big ball of fire
- a big ball of wire
- big boxes where everything is connected to everything

According to Gungor, women tend to remember everything because...

- they have good memory
- they connect events to emotions
- they connect everything to their memory

According to the University of Pennsylvania, men are able to...

- go fishing
- do nothing
- think about absolutely nothing and still breath

Women are irritated the most...

- by seeing a man fishing
- by seeing a man zapping
- by seeing a man doing nothing

Men go to their nothing box...

- whenever they have a chance
- only when they're stressed out
- when they don't want to talk to their wives

When a man is stressed out he needs...

- to talk about his problems
- to go to his nothing box
- his wife to give him some advice

When women are stressed out they want their husbands to...

- help them solve their problems
- give them some advice
- listen to them in silence

AFTER WATCHING THE VIDEO, ANSWER THESE QUESTIONS:

1. What are the men's brains made up of?
2. What is the main rule for men's brains?
3. What are the women's brains made up of?
4. Why do women tend to remember everything?
5. According to the University of Pennsylvania, What are men able to do?
6. What irritates women the most?
7. When do men go to their nothing box?
8. What do men need to do when they are stressed out?
9. What do women want from their husbands when they are stressed out?
10. What do you think about this theory?
