Expanding Brackets – Algebraic Simplification

Expand the brackets by multiplying: The first one is done for you.

1. $3(a - 5) = 3a - 15$

2. $4(d + 3) =$

3. $11(z - 6) =$

4. $2(9n + 5) =$

5. $8(3j + 4) =$

6. $7(5m - 2) =$

7. $12(2 - p) =$

8. $5(3r - 2q) =$

9. $10(4t - 6w) =$

10. $-2(2b + 5) =$

11. $-3(3y - 7z) =$
