Natural Resources

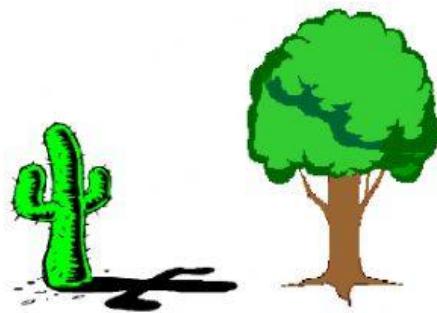

1 Watch:

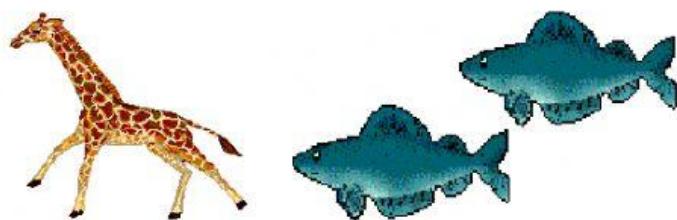

- **Natural resources are things that are found in nature that are useful to people.**
- **We need natural resources to live. Natural resources are things that people and animal can't live without.**
- **Water is a natural resource. We cannot live without it!**

- Other natural resources are plants and soil.

- Animals and fish are also natural resources.

- Some natural resources like oil and coal will be used up if we are not careful.

- Natural resources can be made into things we use.

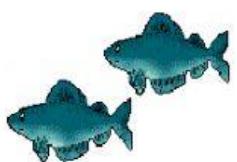

Questions:

1. Which picture is not a nature resource?

2. Which natural resource do we have to be careful not to use up?

3. Where do we find natural resources?

4. How can we use natural resources?
