

Population Dynamics: Limiting Factors

Name:

1. Ais any **biotic** or **abiotic** factor that limits the growth of a population.
2. limiting factors that depend on
3.is a biological interaction where one organism, the predator, kills and eats another organism, its prey.
- 4..... is spread quickly when population density increases.
5. High population densities increase thefor food, water, space, sunlight, and other resources.

Limiting factor	population density	Predation	Disease	competition
-----------------	--------------------	-----------	---------	-------------
