

Vārds: _____

Lineāri vienādojumi!

1. uzdevums. Atrisini vienādojumi, aizpildi tukšos lodziņus. Nepieciešamības gadījumā papilddarbības veic pierakstu kladē!

$$2x + 3x = 5$$

$$5x = \square \quad | : 5$$

$$x = \square$$

$$3y - y = -12$$

$$\square y = -12 \quad | : \square$$

$$y = \square$$

$$-6n - 4n = 30$$

$$\square n = \square$$

$$n = \square$$

$$8m = 3m - 25$$

$$8m - 3m = -25$$

$$\square m = -25 \quad | : \square$$

$$m = \square$$

$$10k = 7k - 6$$

$$10k - \square = \square$$

$$\square k = \square$$

$$k = \square$$

$$10b - 12b = -4$$

$$\square b = \square \quad | : \square$$

$$b = \square$$

$$4y - 18 = y$$

$$4y - \square = \square$$

$$\square = \square$$

$$y = \square$$

$$15a + 3 = 7a + 27$$

$$15a - 7a = 27 - \square$$

$$\square a = \square \quad | : 8$$

$$a = \square$$

$$9z - 5 = 10z - 4$$

$$9z \square = -4 \square$$

$$\square z = \square$$

$$z = \square$$
