

### PARAGRAPH ONE:

- |                              |                        |
|------------------------------|------------------------|
| 1. computer-to-brain         | a. powers              |
| 2. Mr Musk has an impressive | b. on humans one day   |
| 3. Gertrude the pig reveals  | c. technology          |
| 4. Computers could enhance   | d. change our lives    |
| 5. trials would begin        | e. his latest ambition |
| 6. a giant leap              | f. our brainpower      |
| 7. He said it would greatly  | g. into the future     |
| 8. giving us superhuman      | h. record              |

### PARAGRAPH TWO:

- |                                 |                    |
|---------------------------------|--------------------|
| 1. the potential the technology | a. aspect          |
| 2. neurological conditions      | b. fiction movie   |
| 3. our brain is wired directly  | c. the human race  |
| 4. Just like in a science       | d. like strokes    |
| 5. Internet-                    | e. intelligence    |
| 6. The most futuristic          | f. could deliver   |
| 7. artificial                   | g. enabled devices |
| 8. powerful enough to destroy   | h. to the Internet |

Elon Musk has <sup>(1)</sup> \_\_\_\_\_ pig with a computer chip in her brain that could lead to <sup>(2)</sup> \_\_\_\_\_ technology in humans. Mr Musk has <sup>(3)</sup> \_\_\_\_\_ in pioneering technology, from electric cars to space tourism. Gertrude the pig reveals his latest ambition - to allow us to control computers with our brains. Computers <sup>(4)</sup> \_\_\_\_\_ brainpower. Musk announced that trials would begin on humans one day. He believes the technology is a <sup>(5)</sup> \_\_\_\_\_ the future. He said it would greatly <sup>(6)</sup> \_\_\_\_\_ by giving us superhuman powers.

Mr Musk said results from Gertrude the pig <sup>(7)</sup> \_\_\_\_\_ the technology could deliver. He hopes it will help people with neurological <sup>(8)</sup> \_\_\_\_\_ and dementia. It could also mean our brain is wired directly to the Internet. Just like in a <sup>(9)</sup> \_\_\_\_\_, we could control Internet-enabled devices by using our thoughts. The <sup>(10)</sup> \_\_\_\_\_ of the technology is what Musk calls "superhuman cognition". This is to help <sup>(11)</sup> \_\_\_\_\_ intelligence becoming powerful enough to destroy <sup>(12)</sup> \_\_\_\_\_.
