
Matter
General properties
Specific properties
Pure substances
Changes
mass
units of measurement
• g
volume
units of measurement
solid:
• cubic metres (m^3)
liquid:
• cubic metres (m^3)
• formula: $\frac{\text{mass (m)}}{\text{volume (v)}}$
other specific properties
salt
nitrogen
water
types of mixtures
separation methods
• distillation
• filtration
• evaporation
can be
• chemical
• reversible
• irreversible
