A-Petroleum
النفط

B- Natural gas
الغاز الطبيعي

C- Coal
الفحم

Fossil Fuel Formation

Form From the remain of ancient plants and animals that were buried and altered over millions of years.

Activity: Drag and Drop to compare between the types of fossil fuels:

Cooking, <u>heating</u> and manufacturing	The chemical processes that produced petroleum but less dens.	<u>Compound</u> are hydrocarbons
Generating electricity	formed from the decay of ancient organisms Such as (microscopic plankton and algae	Methane, hydro-carbon compounds (propane and butane
Plastic ,cosmetics, medicines, wax ,asphalt t and grease	Solid fossil fuel that can be found in mines. Remines of plants in ancient swamp	Hydrocarbons , sulfur and <u>nitrogen based</u> compounds

Fossil Fuel	Petroleum	Natural Gas	Coal
