

# Funciones trigonométricas Matemáticas

En cada triángulo encuentra la medida del ángulo marcado utilizando las funciones trigonométricas.

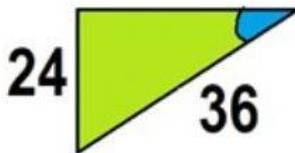

Ejemplo:

$$\cos x = \frac{8}{10} = 0.8 = 36.86$$

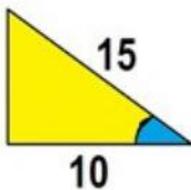

$$x = \text{-----} = \text{-----} = \text{-----}$$

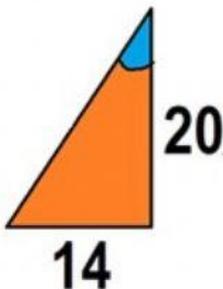

$$x = \text{-----} = \text{-----} = \text{-----}$$

$$x = \text{-----} = \text{-----} = \text{-----}$$

$$x = \text{-----} = \text{-----} = \text{-----}$$

$$x = \text{-----} = \text{-----} = \text{-----}$$
