

Name _____

Date _____

Fractions - Word Questions Ex. 6d

1) Mark ate $\frac{7}{12}$ of a bar of chocolate. What fraction was left?

Solution:

Whole = $\frac{12}{12}$

Fraction eaten = $\frac{7}{12}$

$\therefore$ Fraction left = $\frac{12}{12} - \frac{7}{12} = \frac{5}{12}$

2) I spilt $\frac{2}{3}$ of a pitcher of milk. What fraction remained?

Fraction remaining = _____ - _____ = _____

3) $\frac{6}{15}$ of the pupils in my class are absent. What fraction is present?

Fraction Present = _____ - _____ = _____

4) Tim spent $\frac{13}{20}$ of his money and saved the rest. What fraction did he save?

Fraction saved = _____ - _____ = _____

5) I have read $\frac{19}{25}$ of my book. How much more do I need to read to finish the book?

Fraction to read = _____ - _____ = _____
