Interpreting Pictographs

John counted the number of ladybugs he spotted in his backyard for seven months. Answer the questions based on the pictograph below.

- 1) How many ladybugs were observed in the month of April? _____
- 2) How many ladybugs did John see during May? _____
- 3) For which month was John seeing the fewest ladybugs? _____
- 4) If in any one month John views at least 30 ladybugs, he will add one to his collection. Which months did John get to add a ladybug to his collection? If that never occurred, write 'None'. _____
- 5) Was John spotting more ladybugs in the month of August or in September? _____
- 6) In total, how many ladybugs did John see in the tracked months? _____
- 7) During which month did John spot the greatest number of ladybugs? _____
