

TYPES OF SOIL

INSTRUCTIONS: *Select any one task and record it in your notebook*

Sandy soil

Clay soil

Loam soil

TASK 1

1. Match the words with its correct definition.

Types of Soil	Definition
1. Loamy soil	Big sand particles, dry and rough to touch, hold less water.
2. Clayey soil	Mixture of sandy and clayey soil, good air and water holding capacity, good for plant growth.
3. Sandy soil	Very fine particle, sticky to touch and hold lot of water, used to make pots.

TASK 2

1. Which are the 3 types of soil?
2. Write the difference between each type of soil in a T-chart.

TASK 3

1. Compare and contrast on sand, clay and loam soil.

(Tell how they are alike and different)

Sand	Clay	Loam
