

Circle the correct words.

Julia had never had any (1) **health / healthy** problems, but that day she got up feeling a bit dizzy. She was also very (2) **poor / weak**, and although she had a terrible headache, she drove to work. As usual, she parked her car in front of the office. As she was getting out of her car, she (3) **came round / fainted**. Luckily for her, Bob, her colleague, saw her and gave her first (4) **aid / help**. He then called an ambulance and Julia was (5) **taken / brought** to hospital. She was given some (6) **painkillers / sleeping pills**, which soothed the pain and provided temporary (7) **reduction / relief**, but in fact she wasn't feeling any better.

A week later, she was sent to a health clinic where she had some tests. Fortunately, nothing was wrong. However, the doctor told her that her general (8) **position / state** of health was very poor. He advised her to stay at home and not go to work for a week. He also suggested that she should change her lifestyle, relax and not worry so much.
