

Language alphabet. Syntax

1. Fill out the sentence.

The syntax of a programming language

_____ when writing a program.

2. Move the words to the appropriate place

The comments are used mostly for programmers to read and understand the code. There are two ways to create a comment:

1. The first is to use the symbol. The computer will ignore any text that is written after the '#' symbol in that row.
2. Multiple line comments are slightly different. Use 3 single quotes before and after the part you want to comment.

'#'

(''')

3. Match the picture with the description

Answers:
