

# ENERGY AND ENVIRONMENT

## 1. TICK THE CORRECT ANSWER.

### a. Global warming is the result of:

- Carbon dioxide and harmful gases.
- Oxygen.
- The atmosphere.

### b. Oil spills and radioactive substances:

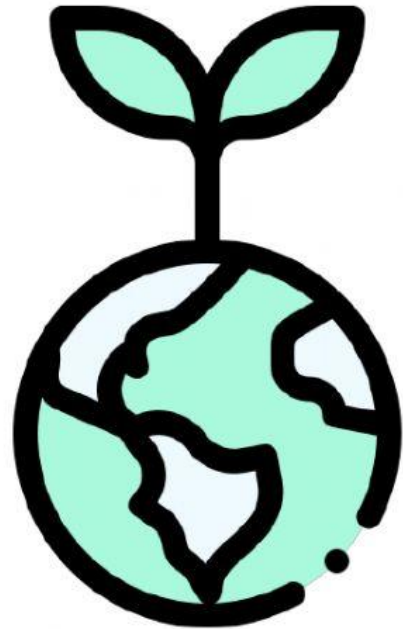

- Are good for sea animals.
- Contaminate rivers and seas.
- Contaminate the land.

### c. The cause of soil erosion are:

- Cars.
- Animals.
- Quarries and mines.

### d. Industrial waste, dams and turbines can:

- Cause the death of living things.
- Produce more energy.
- Be good for the environment.

## 2. Complete:

Environmental \_\_\_\_\_ are the negative \_\_\_\_\_ of energy \_\_\_\_\_. They are damaging the \_\_\_\_\_ and threatening or planet's \_\_\_\_\_. \_\_\_\_\_ consumption of energy is a problem that is putting our generation at risk. We need to create a \_\_\_\_\_ future.

Carbon \_\_\_\_\_ and other \_\_\_\_\_ from factories damage the \_\_\_\_\_, causing global warming.

Oil \_\_\_\_\_ and waste from \_\_\_\_\_ contaminate \_\_\_\_\_ and \_\_\_\_\_.

\_\_\_\_\_ and \_\_\_\_\_ contaminate the land and cause \_\_\_\_\_ erosion.

Industrial \_\_\_\_\_ poured into the \_\_\_\_\_ and seas, dams and \_\_\_\_\_ turbines can kill animals (like fish and birds).
