Keys: order they appear and aim Match the name, the aim and the picture.

1st	The Matchstick Key	Its lock is fixed to a particular door. It can be used to separate one's soul from the body. The body drops dead and in the ghost form, the person can fly around places, pass through walls and communicate with other ghosts.	
2nd	The Anywhere Key	It is one of the most potent keys of all. The lock goes into the back of the neck of a person. While the body is frozen, a door is opened into the brain of the person. Others can enter the brain through the door and access the memories	
3rd	The Mirror Key	When used, it allows a person to make others do their bidding.	
4th	The Head Key	The function of this key is to lure someone inside the mirror and then hold them as a prisoner.	
5th	The Ghost Key	This is the first key that Bode discovers in Key House. Rendell got it in the split and embedded it in a bracelet.	
6th	The Music Box Key	It has the power to burn anything that it comes in contact with. It is one of the simplest keys to use, as it doesn't have to go in any particular lock. Due to its ability to create fire, it proves to be a powerful weapon to anyone who possesses it.
