Interactive Worksheet: Week 25.2/ Self-Learning Program

Exercise 1

Select the statements as True or False:

- 1- Compass is used to help in finding directions (True False)
- 2- The compass contains a bar magnet (True False)
- 3- The needle of the compass always points to the east (True False)

Exercise 2

The steps of using the compass are not arranged.

Put the steps in order.

Use the numbers

- ☐ The east will be as your right hand
- ☐ Hold the compass horizontally, with letter (S) near your body.
- ☐ Repeat the steps to be sure of the direction.
- ☐ Turn around till the north pole of the needle rests on letter (N)

Exercise 3

1-The compass is found in planes, in ships and even in cell phones.

Write below each figure where can we find the compass.

(plane - cell phone - ship)

.....

.....

.....

2- Is it correct to use compass near iron objects or near magnet?

yes - No
